Enclosed is new data on elementary schools provided by the Texas Department of Agriculture (TDA). The data includes all schools in the state that have elementary grades. The list has been sorted alphabetically by school district and by the name of the individual school within each district.

This data must be used for making tier determinations effective for May 1, 2005 and forward. When you redetermine a provider's tier status using elementary school data, you must obtain documentation that verifies that a Tier I provider is located in an eligible elementary school's attendance area.

If you would like an electronic version (e-mail or disc) of the list of elementary schools you may contact Kay Trigg at (512) 420-2510 or kay.trigg@hhsc.state.tx.us
