The United States Department of Agriculture has announced that the Discover School Breakfast Toolkit is now available on the Food and Nutrition Services Website. The web address is www.fns.usda.gov/cnd/breakfast/toolkit.

The Discover School Breakfast Toolkit is a user-friendly instrument helpful for increasing outreach for the School Breakfast Program in schools that participate in the program and want to increase student participation or for those schools that want to start a School Breakfast Program.

The toolkit is public information, and therefore available for anyone to use. However, if portions of the toolkit are used, credit should be given by acknowledging that the portions used were based on the toolkit developed by the Food and Nutrition Service. Acknowledgement should also be given to the American School Food Service Association – Child Nutrition Foundation and the National Dairy Council.
