A revised version of the *Nutrient Analysis Protocols – How to Analyze for USDA’s School Meals Programs* is available for school food authorities (SFAs) to use as a reference when conducting a nutrient analysis of their school meals.

The United States Department of Agriculture (USDA) has revised the *Nutrient Analysis Protocols – How to Analyze for USDA’s School Meals Programs*. This guidance establishes procedures for conducting an accurate nutrient analysis. It is developed for SFAs who conduct their own nutrient analysis of school meals.

Please discard all other versions of the *Nutrient Analysis Protocols – How to Analyze for USDA’s School Meals Programs*.

If you have any questions please contact your Area Program Office.
