Discussion Topics

- Understanding Full Truckload Requirements
 - Understanding the impact of Direct Delivery requests
 - Importance of unified demand across the region serviced by San Antonio Food Bank
 - How to utilize information in forecasting for School Year 2028
- 

Full Truckload Requirements

- For USDA Foods to create a sales order, we must follow the guidance on full truckload quantities.
- Truckloads can be split between additional warehouses, within certain constraints such as driving times.
- This must adhere to "Quarter Truckload" requirements. For example, a truckload of 1,000 cases can only make a minimum stop of 250 cases.
- TDA must also consider the requested delivery periods to allow demand to be spread out and to prevent storage fees at the warehouse.

Direct Delivery Requests

How does forecasting impact truckloads?

- The demand for a material influences the creation of successful truckloads.
- Schools that place larger volume requests help ensure the availability of materials in their warehouse region.
- Spreading out requests among materials of similar categories can reduce volume and decrease the likelihood of a truckload being created.
 - For example, requesting multiple types of corn (such as frozen and canned) rather than choosing just one can impact truckload planning.

Who drives requests for the San Antonio Region?

- Victoria ISD
- Harlandale ISD
- Southwest ISD

- Complete USDA Foods Survey
- Check beginning balance of Planned Assistance Level in Entitlement/Bonus Summary Report in December 2026
- Review which processors you have an awarded bid for in school year 2028 before ordering

Round 1 Processing Diversion Requests

Schools should not be requesting USDA Foods diverted to a processor when bid has not yet been awarded during round 1.

- If you are due for a rebid, it is recommended to focus on direct delivery utilization
- If you are in a renewal year you are safe to make requests as planned.
- If this is currently not your best practice, please reach out to your Cooperative or your schools procurement team to strategize completing the bidding process earlier.

Schools diverting pounds to only find out they do not have an award to draw down has an extremely negative impact on processor inventory.

- This leads to unclaimed inventory at the processor impacting performance.
- This impacts future ordering for the processor as TDA reviews excess inventory and performance metrics of schools.
